## Reasons to Attend

- Good ratio of return clients
- Carefully planned and executed promotion
- Exciting socializing activities and cultural tours
- Meeting new friends and long-term partners

The exhibition will bring together students and international education providers with the focus on recruiting students for foundation, undergraduate and postgraduate levels.

Higher education has recorded strong growth in East Africa in recent years due to increased demand. The use of websites, subscribing to academic journals, use of intranet, social media and other e-learning tools have revolutionised the academic sector in East Africa.

## Market Overview

Altogether, there are about 100 universities in East Africa, both public and private, with Kenya hosting the highest number, 40.

With local Kenyan universities not being able to offer enough places for students, more students are looking into opportunities to study overseas as they also wish to improve their career prospects in the labour market after graduation.

According to University World News, 57% of 1,044 Kenyan students polled in the recent survey said that they would prefer to study in a foreign university than a local one. The number of Kenyans issued with student visas has been on the rise in recent years according to government statistics.

An increase in Kenyan schools offering A-Levels and International Baccalaureate naturally increased the number of students willing to study abroad. Those ones who obtained the Kenya Certificate of Secondary

Education (KCSE) can still apply to foreign universities but most of such students choose to go for Access Courses abroad.

In the past decade Tanzania's public universities have witnessed rapid growth in enrolment. There are nearly 30 public and private universities in Tanzania. Demand for higher education is large with an estimated student population of 15,000.

According to a recent report from the Tanzania Education Sector Analysis, emphasis has been put on higher education, to adequately meet the growing demand from secondary school leavers and produce skills relevant to current and future economic growth. University enrolment has grown at an average annual rate of 30% over 2005-09.

#### **Fair Outline**

Main areas are undergraduate courses and postgraduate courses with a visible increase in interest for professional qualifications. Many foreign universities attract Kenyan students for access and foundation courses in marketing, business, management and IT.

The main subject areas are: business and finance, medicine and related sciences, IT, engineering, hotel management, humanities, law, science, MBA, and distant learning.

**This year, ISFA are also donating to the [Mara Meru Cheetah](#) project, if you would like to donate 5 Euros from your booking towards the charity, please mention this in the comments section of your invoice.**

# Days of International Education Hungary - Fall

## Information

Many education providers have already understood the great possibilities of the Hungarian market for successful student recruitment. This is the market where a certain “gap” has been formed in the area of study abroad offers.

The main aims of the fair are to increase the awareness of study abroad opportunities, promotion of the fair’s participants and their programmes & services, and recruit new students. Participants of the fair will represent a variety of study abroad opportunities.

## Market Overview

The total number of students in the higher education system was over 380,000 during the 2020/2021 academic year. Hungary has 70 operating higher education institutions. Hungarian institutions of higher education have started the transformation toward the regulations of the Bologna system. In the new system, both colleges and universities may launch bachelor, master, and Ph.D. programs provided that the necessary requirements are fulfilled. This also means that all awarded degrees are equivalent and transferrable throughout the EU and many other countries.

## Fair Outline

The importance of the education fair in Hungary for the students, the parents, and the educational decision-makers is given by the fact that it makes them possible to get all the necessary information at the same time, the same place: the students taking an entrance examination in the near future can inquire about the chances and the opportunities to take the entrance exam, while the decision-makers can inquire about the available tenders and the school equipment supply.
